Oilhead Timing Chain Tensioner Upgrade Kit

Kit provides all parts needed to update the left-side cam chain tensioner assembly. Cures the "death rattle" at startup and prevents failure of the timing chain tensioner shoe, which can be a major engine rebuild if it fails. Fits and is recommended for all Oilhead R850, R1100 and R1150 engines from 1993 to 2004 model years. This is already standard fitment in the "Hexhead" models.
